Bicriteria scheduling problem involving total tardiness and total earliness penalties, 17

CIM networking: promise and problems, 205
Complexity index as a base for decision making whether to introduce NC or conventional machines, 187
Computational procedures for stochastic multi-echelon production systems, 223
Controlling different flow rates in job-shop like production departments, 239
Costs and benefits of investment in electronic design, 37

Decision criteria in capital budgeting under uncertainties: implications for future research, 25
Designing principles of production systems based on field research in Europe and Japan, Some, 99
DSS for capacity planning of aircraft maintenance personnel, A, 69
Due-date setting and production control, 59

Economic lot scheduling problem: theory and practice, The, 147
Evaluating flexibility of alternative FMS designs – A comparative measure, 3

Generic bill-of-material: a new product model, 117

Hierarchically structured decision-support-system for demand-oriented shift planning, A, 89

Identifying the firm's characteristics affecting the choice of inventory valuation methods, 11
Iterative determination and matching of part groups and machine cells: optimization and successive approximations, 213

Lot sizing and throughput times in a job shop, 111

Manufacturing practices: differences that matter, 251
Measurable economic consequences of investments in flexible capacity, 47
Multi-criteria models for capacity analysis and aggregate planning in manufacturing systems, 261

Optimal order quantity and pricing decisions in single period inventory systems, 175
Optimal prices of a job shop with a single work station: a discrete time model, 129
Optimal strategies in inventory systems with Wiener demand process, On, 105
Optimization of initial order quantities, On the, 79

Setting customer service levels: an overall cost-approach, 139
Strategic aspects of flexible production technologies: theory and evidence, 197

Use of the PROMETHEE method in the location choice of a production system, The, 165
